

Improve your health with Negative Ions (these are healthy ones) for Optimum Health

Statistics show that 83% of women have disease causing bacteria and odour concerns in their reproductive area. Of these, 63% are caused by bad bacteria and the industrial chemicals used in the manufacture of low quality sanitary towels, which are used by women for their entire menstruating life.

As the Winalite Anion panty liner strips generate beneficial negative ions (as do the sanitary towel anion strips), these panty liners can be used by Men and children, as well as women.

Other uses can be obtained by removing the green strip and placing it on the body where needed. It has been used in such cases as rheumatism, arthritis, prostatitis, muscle pain, athletes foot and more.

Winalite Anion Sanitary Towels are the only towels to have the **WORLD PATENTED Negative Ion Strip** which kills 99.9% bad bacteria where it matters most - in the genital area. These negative ions can also be absorbed easily by our skin when used as foot pads or bandage padding.

These negative ions, or Anions, release between 5,800 - 6,200 cubic centimetres of this healthy oxygen which balances your pH level and enhances hormonal equilibrium resulting in:

1. a less toxic body
2. balanced blood pressure
3. expelled old blood clots from the uterus
4. improved body metabolism
5. improved lung and breathing capacity by up to 20%
6. increased physical stamina
7. maximized weight loss results
8. normalised low blood pressure conditions
9. normalised high blood pressure conditions
10. prevented athlete's foot by using it as shoe pads
11. prevented cervical cancer (when used as a panty liner)
12. prevented dysmenorrhea
13. prevented prostate cancer (when used as a panty liner)
14. regulated blood flow
15. regulated cholesterol
16. relieved bodily tensions
17. relieved migraines/headaches
18. relieved mental stress
19. relieved premenstrual pain (PMS)
20. relieved prostatitis
21. relieved sleeping disorders (without sleeping pills)
22. shortened menstrual cycle
23. shorter recovery time from injuries and surgery
24. smoother skin
25. strengthened body immunity
